When Uncle Sam gets through with his corper of the harbor it will be a model portion of the waterfront. The mayal slips and docks now in course of construction are to be very up-todate in all their appointments. The whole paval reservation, including the coalsheds is to be inclosed by a fence. The cround not used for buildings will he laid out in grass plots and flower beds. The docks will be very substantially constructed and will be covered with a layer of bitumen. This will greatly aid in their preservation. Some think that in this climate bitumen will not be a success on account of the heat; but in the large cities of the East, where the temperature is many decrees higher in summer than it ever gets here the material is successfully applied to streets. The sline will be deen arough to accommodate a versel of twenty-eight feet draught. The work is being done now as quick'v as nos-sible, and six months' time will mark many changes and improvements in the district pre-empted for navy uses by the Government,
